Tech Stack: ReactJS, NodeJS, MongoDB

Grabber56

Built a functional prototype to track the customer complaints of the products for the small scaled companies in a better way and exposing the data in the form of charts for the company to analyze and improve their efficiency.

Tech Stack: ReactJS, NodeJS, ChartJS, MongoDB

<u>**Online Courses**</u>**:**

Algorithms Specialization (Just enrolled):

The course is offered by Standford University through Coursera and covers Data structures and algorithms.

MERN Stack front-to-back:

The course was offered by Udemy and I learnt building a developer's connector app using React, Redux, Node and MongoDB from scratch.

The Web Developer Bootcamp:

The course was offered by Udemy and covered the basic concepts of HTML5, CSS3, Bootstrap, jQuery and NodeJS.

<u>**Education**</u>**:**

Bachelors in Electronics and Communication Engineering, Jain University, Bangalore, CGPA (8.9 / 10)
